Summary — Computer Engineering graduate (2024) from Savitribai Phule Pune University with a 7.74 CGPA and nearly 2 years of hands-on experience in full-stack web development. Proficient in building scalable, user-centric applications using Next.js, Express Js, PostgreSQL, and TypeScript. Recently contributed to LLM training as an AI Trainer. Seeking to join dynamic teams building high-impact software products. Available for immediate joining.

Skills

Languages JavaScript, TypeScript, C++, Java, SQL
Frontend React Js, Next.js, HTML, CSS, MUI, Tailwind
Backend Node.js, Express, JWT Authentication
Database PostgreSQL, MongoDB, MySQL

AI Tools GitHub Copilot, V0, Vercel, Lovable, ChatGpt, Gemini, Grok AI, Claude
Other tools Git, GitHub, BitBucket, Redux, Postman
Familiar AWS S3, AWS EC2, NestJs

Experience

Outlier AI

April 2025 – Current

AI Trainer (Freelance)

Remote

- Worked on training SFT and RLHF Large Language Models by crafting **high-quality prompts**, evaluating model outputs, and iteratively **refining responses** to improve accuracy, coherence, and task alignment.
- **Reviewed and corrected 50+** AI-generated **front-end** code snippets (HTML, CSS, JavaScript, TypeScript, Next.js) for syntax, functionality, and UI best practices.
- **Analyzed** and annotated **20+** open-source **GitHub PR** to improve model understanding of real-world development workflows and commit intent.

Gearup Cycle

October 2023 – April 2025

Full Stack Developer

Pune, Maharashtra

- Contributed to establishing the company's web presence. Delivered a E2E seamlessly functioning and **user-friendly** platform that enhanced **customer experience**.
- Developed full-stack applications using **Next.js** for dynamic user interfaces and Nest.js in backend, leveraging **AI tools** for faster development. **Deployed** full-stack application on AWS EC2 using Nginx and PM2.
- Conducted over **50+** code reviews, implemented best practices and **agile methodologies**, significantly enhancing overall **code quality, cleanliness** and **readability** and scaled to manage **1000+** customers and **2000+** orders.
- Utilized **TypeScript** to reduce runtime errors by **100%**, for more maintainable and reliable and less buggy codebase.
- Designed and optimized **ER diagrams** for a complex database structure, including 10+ tables on a PostgreSQL database. Used Prisma ORM for seamless transactions between the back-end server and Supabase.
- Architected and optimized scalable **PostgreSQL** databases with **Prisma** ORM, ensuring seamless NestJS integration, efficient queries, and strict data integrity on Supabase.

Gearup Cycle

April 2023 – September 2023

MERN Stack Developer (Intern)

Pune, Maharashtra (Remote)

- Pioneered the creation of an intuitive **pixel perfect** and **responsive Admin dashboard** UI with React JS, effectively monitoring technician movements as activity logs and **managing** orders for **3 cities**.
- Optimized API response times by **50%** through the implementation of **server-side pagination** and custom objects.
- Increased backend performance by **50%** and scalability by 35% by developing and maintaining **full-stack** applications. Scaled back-end with **API testing** and unit testing using Postman and Thunder client.
- Enhanced system functionality and security by integrating **JWT authentication**, Firebase Cloud Messaging, Nodemailer, MUI, and over **20** libraries.

Projects

Short Stats

[Demo](#) | [GitHub](#)

- Engineered a full-stack web application with MERN Stack, for customers to **create short links**, and **track URL visits** with click count, date and time to improve search visibility to their brands.

Social Share

[Demo](#) | [GitHub](#)

- Rapidly implemented a web application using JavaScript in both front-end and back-end, allowing users to **create** and **share thoughts**, quotes, and ideas within a tight **48 hours** time-frame to showcase programming efficiency.

TechTree

[Demo](#) | [GitHub](#)

- Innovated a platform enabling users to design and access **personalized tech trees** linked to their social media and tech profiles on **20+** platforms, such as Twitter, LinkedIn, and LeetCode.

Education

Savitribai Phule Pune University

Bachelor of Engineering - Computer Engineering (CGPA: 7.74)

Balbhim Arts, Commerce and Science College, Beed

HSE - PCMB (Percentage: 72.46)

August 2020 - June 2024

Pune, Maharashtra

March 2020

Beed, Maharashtra

Achievements

- Finalist - **Smart India Hackathon 2022** led a 5-member (Back-end) team in a national-level innovative hackathon.
- Obtained **2** stars at Leetcode, earned **3** stars at Hackerrank.
- Solved **100+** DSA, OOPs questions with C++ programming and **40+** DOM questions with JavaScript.
- Attained **JavaScript Certification** and **React Certification** from Great Learning and Codedamn.

Licenses & certifications

- **JavaScript Under the Hood** - Codedamn.
- **React JS fundamentals and Advanced** - Great Learning, Codedamn, Hackerrank.
- Postman Student Expert.
- Certificate of Participation in TATA Crucible Campus Quiz.
